

A PROMISE TO THE PLANET; NEW RESERVED FORESTS OF TAMILNADU

Tamil Nadu, home to varied landscapes and rich biodiversity has always been in forefront in conserving its forest areas. Significant initiative has been taken towards this in recent years by notifying new Reserved Forests. This endeavour not only safeguards state's precious natural resources but also unlocks a multitude of ecosystem services that benefit both people and the planet. By declaring these areas as protected forests, we are not only conserving vital habitats for countless species of wildlife, but also ensuring the continued provision of essential ecosystem services.

These forests will act as lungs for our planet, producing oxygen, filtering water, and regulating the climate. They will also provide a natural barrier against soil erosion, landslides, and floods, protecting communities living in and around these forests. The expansion of forest cover in Tamil Nadu will have far-reaching benefits, from supporting rural livelihoods to mitigating the impacts of climate change. These forests will serve as carbon sinks, absorbing and storing carbon dioxide, and helping to reduce India's carbon footprint.

This repository is a celebration of Tamil Nadu's commitment to environmental conservation and sustainable development. It showcases the natural beauty, ecological significance, and cultural importance of these newly notified reserved forests. We hope this book will inspire readers to join us in our mission to protect and preserve Tamil Nadu's natural heritage, and to recognize the immense value that these forests bring to our lives and our planet.
